LUNAR SHIFT – THE TRIP a BIG SQUARE RECORDS RELEASE

with remixes by Merka & Joebot
Big Square Records Cat: BGSQ011

Release date: 22nd February 2010

With releases on labels such as Bass Reflections, Supatronix, 192K & Ego Shot, Lunar Shift now make an appearance on a Big Square Record. Ian & Dan get things rolling with tuff breakbeats & old skool rave stabs; all topped off with a seductive voice that's a perfect foil for the heavy bass & tight production. A dancefloor destroyer – fact. Lunar Shift are on a trip to the top!

For the first remix we're proud to have breaks tallest super producer back showing off his skills on Big Square. Yes, it's Merka, the Fat! legend, after having a lovely baby daughter Mark Ford returns to his trademark leftfield squelchbeat funk by taking The Trip & tripping it right out. His remix twists & turns taking elements from the original & weaving them together in a way only Mystic Man Merka can. It's good to have him back. <http://www.myspace.com/mymerka>

"Totally irreverent, yet has da funk & works on the floor (4.5 out of 5)" DJ Magazine

Last up Joebot chips in to top this release off in a pure big bass roller stylee. One for the raving crew. Jam packed with a booming bottom end & ear popping stabs it's easy to see why Joe is in big demand lately. This boy's on fire, it's amazing he has time to DJ all over the country, be a resident at Spectrum & churn out cracking tunes like this one. <http://www.myspace.com/joebotdj>
