

New Radio Stream Web Player!!

Posted by twinkdogg - 2009/07/17 18:36

We have a new web player that you can use on your web pages, myspace, etc.. It's flash based so it should work for everyone. (Obviously you have to have Flash but who doesn't? :))

Direct Link To Player:

<http://player.nubreaks.com>

Myspace Code:

Nubreaks.com Radio

The Myspace code above can be used on any web page or any site that accepts html OBJECT tags.

If you have any questions or problems feel free to hit me up.
