

Vsti anyone ?

Posted by J.WILKS - 2007/11/23 13:38

Im new in production and Im working on my first track.

Im trying to find out which vsti give out the heavy grimmy sound that you here from nuskool. Like the sounds from deep impact, autobots, hardcore beats.etc.

I have tried contacting a few artist and they have not returned my mesg. I guess giving out which vsti you have is like showing your weapons to the enemy. lol

Im using live 6 and a few samples from here and from another artist that I have tweeked but I still need something that bring that nuskool to the table.

Any advice would really help.

Thank you.

Jason

Absynth 4 is wicked, you can do a lot of cool stuff with it. Massive sounds the dogs, but is taxing on CPU.

Download some demos and try em out!
