

Installing VSTI's

Posted by joe mellow - 2008/01/19 08:44

I'm having a slight bit of trouble installing VSTI's. I'm using Ableton Live 7 and running this on vista. Should I be using uptodate versions of stuff or am i just gettin dodgy sybths that don't work?

As long as the VST's are in the plugin folder they should be ok. I'm not an expert with Vista, but it could be compatibility issues. Did you buy the VST's?
