

## tracked cd's

Posted by Spec 1 - 2010/09/02 10:11

---

i had some live dj mixes that i originally "tracked out" in soundforge. later i had to make space on my drive so i made all the "tracks" into mp3's.. now when i burn the discs with no pauses there is still a fraction of sound missing. i assume the mp3 compression jacked up the orig audio information. is there a way to resolve this? i have 8 tracked mixes that might be fvcked, and i hope it is not the case

thanks. spec 1 :woohoo:
