ARTILECT (real name Dylan) began in Manchester–UK in the mid 1990s as a lover of hip-hop first. His passion for breakbeats lead him down the enticing road to Hardcore and Jungle music. An appreciation and admiration of all electronic music was developed during that decade, from Detroit sounds to Acid Techno, he soaked it all up. Fast forward to right now and this boiler pot of bass and beats, jolted by his obvious influences from dark and moody, yet luxurious sonics, displays scrupulous knowledge of drum & bass where influences from his first loves are evident. It's all about the interaction of the elements that make these tracks so delectable. Drum and bass funk in its finest.
Who can argue with the style and selection when you get on the Rupture DJ roster!
