

Digital Base & Andy Vibes - Baby Don't Go *OUT NOW

Digital Base & Andy Vibes drop their next breakbeat bomb Baby Don't Go on Toast & Jam Recordings. Stalwarts in the breakbeat scene for over a decade, these guys have a unique production touch that's becoming harder and harder to duplicate these days. The drum sequencing is chunky yet crisp with an old skool drum kit feel to it. They incorporate some female vocals into the breakdown while layering in melodic chords right on through the build. The beat drops in with a flawless transition, giving way to the rolling bass line which keeps the vibe extra funky. Smooth and polished production from a couple of pros!
