

Chevy One - Can't Blame You *OUT NOW ON BANDCAMP!*

Posted by thegulfgateproject - 2020/11/30 23:50

London-based producer Chevy One returns to Toast & Jam once again with his latest breakbeat creation Can't Blame You. Can't Blame You has a low-slung brooding feel to it as the lead vocal sits atop a relentlessly steady sub bass synth. Chevy works in an acid synth line during the breakdowns to build up the tension before hitting you with the minimal-style drop featuring the vocal, bass, and a zesty percussion line. Quality craftsmanship from our man Chevy One right here!
