We are excited to bring you two huge remixes of Grave Member's In The Mist Of It All. For the breaks fans, we tapped the legendary Rennie Pilgrem for remix duties. Using a healthy dose of synth sounds from the original, Rennie adds a punchy analog drum kit along with some original synth work of his own to give it his signature sound and bring you a breaks track that chugs right along. We then reunited with Toronto-based producer Liam Keery for a tech house journey into sound that seamlessly moves and shifts from moments of dark mystery into explosions of euphoria. Enjoy the ride!
