

Chevy One - Late Night Dialing ***OUT NOW!!!***

Posted by thegulfgateproject - 2021/09/20 01:00

London based producer Chevy One is back with a sexy-smooth breakbeat jam and it is a heater. A digitally processed vocal soars over a funky drum kit as synth stabs are filtered in and out. The break introduces us to some sweeping pads as an electro-piano takes the track right out into hands-in-the-air territory.
