

Corey Croft - Beddi ***OUT NOW ON BANDCAMP!!!***

Posted by toastandjamrecordings - 2024/01/18 19:16

We've got a lovely slice of progressive breaks for you from Phoenix based producer Corey Croft. Beddi features some very crisp drum programming to keep the groove pumping while sweeping pads and stuttered vocals float through the track. A sub bass line punches through the mix to provide a solid groove to the high end arpeggiated synth. Dreamy vibes from Mr. Croft on this one!
