Habersham/Komposit: "Leonardo Di Casio - love the textures in this one, the steady synthline reminds me of Underworld or something - but the switch ups are wicked hot :D The Real - this is going to be huge! Love the Vocoded vox, the classic housey bass stab and the dissonant keys - a winner for sure!

Clitoris Bite Boogie - First of the all - the name is the BOMB :D Second - this track is the JAM - so so sick Thanks Modul - your consistency is amazing to date, and thanks to Chi for this wicked release! "

Bite Boogie' is the one that dos it for me."
