Review by: Malone

By his own admission, this young Spanish artist serves up "hard productions done strictly for the dancing floor". Indeed he does. Generally described, Wardian's sound is dark, fat and rolling, complemented by minimalist flourishes and highly polished production values.

A: Altered States

Kicking off with crisp, stepping beats and tints of ominous lead melody, Altered States builds swiftly into a growling beast; yet it remains reserved enough not to fall into overt tearout territory, instead grabbing your interest with a sculpted groove roughly akin to Ed Rush & Optical at breaks tempo. The aforementioned lead is retained throughout, perhaps dampening the musicality slightly but resulting in a properly wicked trip nonetheless.

AA: Chewing Bomb

I can see both the tearout and Fingerlickin' crowds going for this one. Sporting elastic beats, punchy bass, playful blips, snarls and subtle mid melody, Chewing Bomb has an accessible-but-still-intense vibe that I'm enjoying more and more with each rotation.

AAA: Pixel's Orgy

Another dark roller, this time punctuated by 8-bit arcade sounds and sporadic stabs of Prodigy synth (circa '92) that ride effortlessly over a throbbing bassline, while adding a touch of levity to the proceedings.

To sum up, I'm very impressed by Wardian's deftness behind the controls, and have a strong suspicion that we haven't yet heard the best from him, which is good cause to be excited.
