DOWNBEAT 021

D-RANGED – PLASTERED

Clip: <http://downbeatproductions.com/ceos/plastered.mp3>

Rolling drums under a piano melody start this massively thumping tune off. Hitting the breakdown, the raga vox show their flex as the tune begins to evolve. As the body drops in you'll be slammed with a massive rollout of ultra heavy low-end bass with grit overtop running like a locomotive from hell. Nice and driven is the aim of this track as the tune rides out in full on thickness.

D-RANGED – BACK

Clip: <http://downbeatproductions.com/ceos/back.mp3>

Stomping from beginning to end, this tune is a full on bass in ya face mutant. Very unique sounding with big punchy drums, this tune will cause some serious mayhem. Loads of samples used perfectly go into the mix of bass rumpidge as the tune moves on. Great changes and ideas come into play as this beast thumps its way through the bone of your skull, leaving you utterly helpless.

RELEASE DATE: June 9th
