Still on form after his last two chart-smashing releases, Perpetual Present is back with another hugh release.

Perpetual Present - Neutralise The Acid (Original Mix)

Neutralise The Acid is progressive, solid, euphoric, good time breaks leading to a huge build and drop. A tune destined for this summers late night festival sets.

Perpetual Present - Nothing Real (Original Mix)

On the flip, Perpetual Present now brings some bassline tech-breaks to the table. Nothing Real combines electro percussion, hits and fx leading to an unexpected build, then straight back to the bassline goodness. Set to be another peak-time dancefloor bomb!
