We proudly present 'Evolved Breaks' progressive breaks compilation album, compiled by Retroid. On this album, you can find on 10 beautiful original progressive breaks tracks from various artists such as Aeron Aether, Retroid, Parallax Breakz, Felix Stone and many more all of whom, for anyone who is in to the prog breaks scene, you will no doubt recognise.

DJ support from Matt Darey, Yreane, Retroid, Adam Fogarty, Dj Slang and many more.

"While progressive breaks is almost an extinct genre, giants (and I'm not exaggerating) like Retroid still nurture the very essence of this fantastic music. It's clearly visible (or audible) that this is a painstakingly mastered mixture of soundscapes, passions and pains - and by mastered I don't mean the technical mastering. But as I stated many times before, Adam is a rear case of a great musician, fantastic producer and gifted DJ - this is why this album touches so deep the heart and soul of any fan of the real progressive electronic music. I won't give any opinions on single tracks from this album, because, simply put - it is an organic masterpiece that should be experienced only in a whole." - D-Phrag
