Prominent Boston dj, DJ DC, will be showcased this week with a special guest mix comprised of the tunage he played at TENSION opening for the Rogue Element. This exclusive mix is NOT to be missed!!

DJ DC grew up outside of Boston in the town of Milford. "It was the 70's and some of my earliest memories revolve around the music that I was exposed to. Early on disco and classic rock. Then came new wave, synth pop, funk and most important of all...electro." Breakdancing and its music hit mainstream america when DJ DC was in elementary school. Imagine hearing Whodini's "Magic's Wand" as an 8 year old. It definitely had an effect on him with the electronic elements in the music being his favorites. The Who's "Eminence Front," The Car's "Moving In Stereo," Steve Miller's "Jet, AirLiner, and Threshold," and Pink Floyd's "Welcome To The Machine" were rock tracks that featured great synth sounds. To him, those sounds MADE those songs...

...Fast foreward to today. DJ DC is a producer and dj. Together with his collection of vinyl and classic analog gear, he hopes to spread a pure sound. A sound which focuses on electro breakbeats. "This was the beginning of electronic music as we know it and I pledge to spread it into the future," says DJ DC. After all electro was the sound of the future from the start. Listen to an electro track from any year and it still sounds good, because it still sounds like the future.

Freestyler, Pendulum - "Painkiller (Noisia Remix)" - Against the Grain  
Another tune  
Matrix, Futurebound - "Coast to Coast"- Viper

Further Bio Info on DJ DC

DJ DC has been involved in the Boston Underground EDM scene since the early nineties. He is a founding member and resident with Boston Breaks and Monstamind Productions. Working to expose the Northeast to breakbeats at various one off's and at the now legendary Tension @ The Phoenix Landing.

Inspired by the early days of analog technology and a pile of records, he began producing and spinning in his bedroom studio in 97. After several years of experimentation he played his first live P.A. at the Zeitgeist gallery in 2000 with a just a desktop computer. This would be the catalyst of his shift to hardware. With live sets at ZeroGsounds and Monstamind events under his belt he shifted his focus to dj'ing.

Since then he has rocked dancefloors around new england and NYC. Whether it's nu or old DC'S sets draw upon the versatility of the breakbeat.

Please enjoy responsibly :D :D
