

## Is there a 'show all posts since last visit' option?

Posted by alex\_I - 2007/07/08 12:36

---

That is the feature I find most useful on a board, but can't see it here.

If there is one please let me know, if not, please could we have one?

By the way I know there is a recent forum posts box, but that isn't what I mean.

yep i agree with alex, its a pain in the arse searching for new posts through all the different areas imo.

there's a "recent posts" link, but that's only on the main page...

:)

there's the recent posts link on the front page of the site, along with "updated topics" link - which is pretty much the posts since last visit type thing...

also, on the main forum page itself, there is a link inside the forum stats area that shows all recent posts - but not as titles and links, but 10 posts per page from all threads... very easy to follow and use :)
