### DEEP GARNET RECORDS ARTISTS PROMO DEEPLY UNEXPECTED

All species of garnets possess similar physical properties and crystal forms, but differ in chemical composition. DEEPLY UNEXPECTED aka Pyrope (from the Greek pyropos meaning “fire-eyed”) is red in color and chemically a magnesium aluminium silicate with the formula  $Mg_3Al_2Si_3O_{12}$ , though sometimes his Deep-Breaks sound can be replaced in part by awesome Spacey darkish atmos, tasteful Acidic drops and ferrous iron. The color of his sounds varies from deep red to black and his precious tracks been recovered in DEEP GARNET RECORDS laboratories from the Sloan diamondiferous kimberlites in Colorado and from Tertiary Age at Cedar Mountain in Epirus.

A variety of DEEPLY UNEXPECTED is a violet red-shade and has been called Rhodolite, Greek for “rose”. In chemical composition it may be considered as an isomorphous mixture of Deep Darkish Breaks sounds with a dash of Spacey atmos, Acid props and ultra thrillin slight Proggy mints.

DGR002 DEEPLY UNEXPECTED-L.I.N.&T.Y.D. (with AURAL ABUSE remix)

DGR010 ONE ARC DEGREE-A CUP OF TEA ON TITAN (with DEEPLY UNEXPECTED remix)
