DEEP GARNET RECORDS ARTISTS PROMO KAWATIN

All species of garnets possess similar physical properties and crystal forms, but differ in chemical composition. KAWATIN is also known as Uvarovite, a chromium-bearing garnet group species, referred with the formula $\text{Ca}_3\text{Cr}_2(\text{SiO}_4)_3$. His sounds were discovered back in 1832 on a half-broken pre-historic laptop inside a steaming Japanese volcano by the Russian statesman and amateur mineral collector Sergei Uvarov (this is where the Uvarovite derives). He's one of the rarest of the garnet group minerals and is the only consistently green garnet species, with an emerald-green color. It occurs as well-formed fine-sized crystals. His sound is just like a time-travel and DEEP GARNET engineers travel from past to future, from Finland to Norway and South Africa where they've identified Futuristic-Breaks gems like "HIGH PRESSURE INJECTION", Russia and Quebec in Canada to secure his remixes for "DECLINE OF WESTERN CIVILIZATION" and "ASSEMBLER". Lately our engineers identified some new hidden gems in Outokumpu mountains in Finland and proceed them to our laboratories for further investigation.

DGR003 KAWATIN-HIGH PRESSURE INJECTION (with T.R.O. remix)

DGR005 ADA MING-DECLINE OF WESTERN CIVILIZATION (with KAWATIN remix)

DGR009 FABRICS-ASSEMBLER (with KAWATIN remix)
