Welcome Cafeman, with his debut release on Census Sound Recordings. 'This Is Acid' with it's lush atmospheres and bubbling acid line harps back to the early days of acid techno, perfect for the big room and bringing a more proggy breaks sound to the label.

On the remixes we are delighted to present two of the current heavyweights in the breaks/techfunk scene. First up is LOT49's young blood Yreane cranking up the stomping acid breakbeats, with his exemplary production style that has rightly earned him a reputation as one of Russia's hottest producers.

The second remix from Hungarian producer TheLucky23 is a stunning infectious deep techy roller full of soul and crafted to perfection, bringing his much in demand style to Census. This is big, This Is Acid!
