

Incredible Melting Man - Go Ahead Remixed OUT NOW!

Posted by toastandjamrecordings - 2024/01/25 00:45

We've got another outstanding remix package for you here as The Incredible Melting Man's Go Ahead gets the business. Seth Vogt kicks us off with some silky smooth textures and soundscapes. A twinkling piano and deeply evocative rolling pads and synth bass give this remix its unique progressive breaks vibe. Next we have Pharmonic & Jesse KP giving a gnarly electro reworking to the original. Wobbling bass takes center stage as this duo slices and dices the original synth and vocal elements as they cut back and forth between chunky breakbeat drum sections and 1/2 time trap sections. Two stylistically unique offerings for you to choose from here.
