joonie has been involved with this music since the early 90's, in colorado, when roving groups of 18-20 year olds broke into warehouses to throw parties unsanctioned by any fire marshal. this same feeling of acceptance that has touched all of us in this "rave" scene kept joonie around until a lust for the music moved from dancing to spinning records and now, finally to making his own beats.

the funky breaks mashed in with the grit your teeth, meaty, nuschool breaks are the records his chooses to play today but he is always down for new evolution...the newschool.

joonie has travelled the world and honestly feels quite strange referring to himself in the 3rd person.

representing bybb wherever he is located is and always will be priority one in joonies music path.

check joonies show on thursdays at 330-5pm (pacific time)

joonies funtime country music jamboree!
